*Frequently Asked Questions*

# LOTUS LASHES

## *Frequently Asked Questions:*

### WHY DO YOU NEED A PATCH TEST?

*To test the products that will be used in the treatment to ensure that you won't have an allergic reaction. You need re-patch tested if you haven't been back to the salon in 6 months as a condition of Insurance.*

### WHICH LASH TYPE SHOULD YOU GO WITH?

*We offer a 15-minute consultation and patch test which allows us time to chat about the look you desire and lets me see your lashes and eye shape so I can advise what lashes are suitable for you.*

### WHEN DO YOU COME IN FOR AN INFILL?

*Infills should just be that: to fill in gaps and spaces where extensions have shed or fallen off. The longer you leave between visits to the salon the more gaps will naturally happen, so visits between 2-3 weeks is best.*

# LOTUS LASHES

*It's almost time for you to get a lash infill!*

## WHY DO YOU NEED NEED INFILLS?

*Your natural lash hair-growth cycle occurs over a 90 day period. This means that your natural lashes will begin to shed to make room for the new lash, and as such your lash extension may loosen or fall out, causing gaps to appear.*

## HOW OFTEN DO I NEED TO DO INFILLS?

*The general rule of thumb is every 2-3 weeks you should be having a lash infill appointment to keep them looking their best and filling in the gaps of the outgrown lashes.*

## HOW LONG DOES AN INFILL APPOINTMENT TAKE?

*This depends on the amount of time left between your initial appointment and the infill appointment. Thus, anywhere between 1-2 hours depending on the state of your lashes*

# LOTUS LASHES

## *Frequently Asked Questions:*

### DO WE DO INFILL'S FROM ANOTHER SALON'S WORK?

*No, for several reasons:*

- Different quality of workmanship*
- It's hard to replicate the style they chose for your eye-shape*
- The curl, diameter, and lengths they have used are unknown so I may not be able to match these to blend in.*

### UNSURE WHY YOUR LASHES AREN'T LASTING?

- Have you followed the correct aftercare instructions?*
- Are you using the correct lash products?*
- Are you avoiding oily products on your eyelid?*

### DOES LIFESTYLE PLAY A ROLE IN LASH RETENTION?

*The answer is yes! The following can affect your lash retention:*

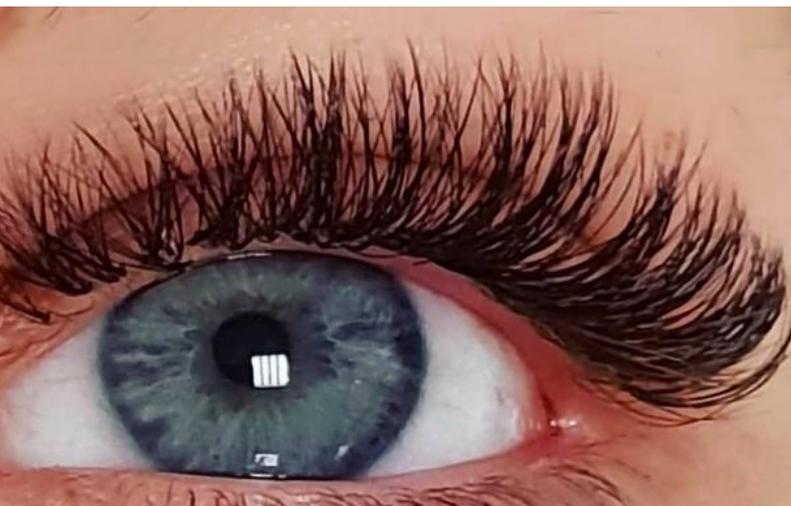

*Swimming, sunbeds, sauna, humid environments, sleeping on your face, medication, among many other factors.*

# WHICH LASH TO CHOOSE?

## Factors to consider when choosing your lash extension:

Deciding which lash to choose will ultimately depend on your desired outcome in terms of appearance: do you want to be bold like the lashes on the right or more natural? See the lash types below with their qualities and see which one sound like it is the best fit for you.

## RUSSIAN VOLUME

Russian volume lashes give a full, dark, fluffy look. They are a lot bolder than the other lash extensions and are known for making a statement.

## HYBRID LASH

Hybrid lashes are a 50/50 mix of Classic and Russian volume lashes. They give a natural wispy, slightly fuller look in comparison to the Classic Lashes.

# WHICH LASH TO CHOOSE?

## CLASSIC LASH

Classic lashes are the most natural-looking extensions.

They give an uplifted, mascara'd look which adds length.

If you are looking for something subtle then these are the best option.

## SPIKY VOLUME

A modern twist on the traditional Russian look. Giving a more spiky & textured look but still creating density.

These can vary from medium to full, depending on the desired look.

## YY LASH

The "YY" lash is perfect for those who like the look of light volume but don't have the time for Hybrid or volume service. The result gives a nice feathered look.

FREQUENTLY ASKED QUESTIONS

# HD BROWS

## WHAT ARE HD BROWS?

- HD Brows is one of the most established brow brands in the UK.
- Accredited HD stylists are educated and trained to offer clients a completely bespoke brow treatment. This includes a personal consultation looking at what your brow goals are and how they can be achieved over a series of visits, or how your brows can be maintained once you have achieved your goal.
- Whether your goal is to grow back over-plucked brows, tame bushy brows, create a better shape or even just maintain your brows, there is a solution for you.

## HOW LONG DO HD BROWS LAST?

- The effect of the treatment can last 4-6 weeks but this all depends on client's own hair growth rate and aftercare.

# HD BROW TREATMENT PROCESS

## 1) Colour:

Your stylist will custom blend HD tints to achieve the desired colour to compliment your own unique skin tone and hair colour

## 2) Shape:

Your stylist will measure specific points in your brows using HD mapping techniques to create a shape that not only compliments your own unique face structure but works toward achieving the overall look you desire and are working towards achieving.

## 3) Removal:

Your stylist will remove unwanted brow hair using removal techniques such as waxing, tweezing, trimming and threading whilst using HD exclusive products to minimise the risk of redness and grazing of the skin.

## 4) Finishing:

Your stylist will perfect your finished brow look using HD brow products and techniques which you will be shown so you can recreate yourself at home.

## DO YOU STILL NEED A PATCH TEST IF YOU HAVE HAD HD BROWS BEFORE AT ANOTHER SALON?

**Yes.** A patch test is to test you with products in-case of allergic reaction. With HD tint this must be done 48 hours before your appointment. However, the treatment can still go ahead, minus the tint, should you not patch test beforehand. A record of your patch test is held as a condition of salon Insurance.
